## **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/16/2009 has been entered. Upon entering the submission, claims 1-9, and 14-24 are pending in the instant application and are under examination on the merits.

### ***Terminal Disclaimer***

The terminal disclaimer filed on 01/16/2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of co-pending U.S. Patent Application No. 10/522,955 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Response to Arguments***

#### **Claimed foreign priority**

Applicants' argument regarding claiming foreign priority of this application is acknowledged.

#### **Claim rejection under 35 U.S.C. § 103(a)**

Applicants' amendment by deleting " $-(CH_2)_kCONR^3R^4$ " and " $-(CH_2)_kNHCOR^3R^4$ " as substituents of the fused-ring A obviates the rejection under 103(a) over the '428 publication.

Applicants' argument over the rejection over the '955 publication by Angell et al. is on the ground that it is improper to both reject the instant claims over the disclosure over the disclosure of the '955 publication and also to provide an obvious-type double patenting rejection over the same, and as Applicants have submitted a terminal disclaimer herein, this rejection should be obviated. Applicants' argument has been fully considered, but not persuasive. ODP rejection and 103a rejection base on different rules of the patent statute. A terminal disclaimer cannot be used to overcome a rejection under 35 U.S.C. 102(e)/103(a), see the last sentence of MPEP§804.02(II). This 103a rejection is based on both 102(a) and 102(e) prior arts. In addition, the instant amendment fails to overcome the rejection. Therefore, the rejection is maintained. Please see MPEP for detail on how to overcome a 103(a) rejection based on both 102(a) and 102(e) prior arts.

**Obviousness-type double patenting rejection**

Applicants' filing the terminal disclaimer over the co-pending the '955 application has been approved, which obviates the ODP rejection.

**Conclusion**

No claim is allowed.
